

# Acting Workshop for business people

## **Workshops**

This workshop will build your confidence and give you the tools to achieve better results at work. You will be able to use everything we cover in everyday life, or in the work place to give 1-2-1's, or lead a presentation to a hundred people or more! Building your confidence and improving your presentation skills is a proven way to accelerate your career. And during this workshop you will discover how to turbocharge your confidence - through practise, practise and practise! A key component in this workshop is experiencing failure and embracing that you absolutely **MUST** fail to grow! At the end of the workshop you will be ready to stand up and be confident in any situation!
